Technical Skills

Languages:	**TypeScript**, JavaScript, **Python**, Java, **C#**
Front end:	HTML5, CSS3, jQuery, **React**, **MUI**, Tailwind.css
Back end:	Node.js, Express.js, **Restful API, Mongo DB, MySQL**
Tools:	**Git**, Jira, vite, **Figma**, Linux, **AWS Cloud, Azure,** Unity

Project Experience

Orbit: https://msa-phase2-woad.vercel.app/
A gamified writing platform where users can share stories and thoughts, earn reward points through engagement, and use those points to unlock planets that showcase their own unique virtual universe.
Technologies: **C#, React, Typescript, PostgreSQL, Three.js**

- Developed backend APIs in **C#**, using **Scalar** for API documentation and testing, with full **CRUD** functionality.
- Used **Zustand** for efficient frontend state management.
- Built interactive 3D planet visualisations with **Three.js** to support the platform's gamification experience.
- Wrote unit and component tests for key frontend functionality using **Vitest**.
- Deployed the React frontend on **Vercel**, hosted the C# backend on **Azure App Service**, and used **Neon Postgres** as the production database.

Work Experience

Long-Life Assistant - Woolworths - Part-Time from June 2024 to March 2026
Pharmacy Assistant - Chemist Warehouse - Part-Time from January 2023 to June 2023
Carpenter - High Quality Home Limited - *Full-Time from November 2021 to February 2022*
Waiter - Empress Garden Restaurant - *Full-Time from November 2020 to February 2021*

Additional Activities & Certification

2025, **AWS Cloud Practitioner Certification**
2025, First Aid Certification
2025, WDCC & SESA **Hackathon Event**
2024, AWS & NextGen **Cyber Jam Event**
2023, KPMG Consultanthon Event
2021, New Zealand Programming Contest (NZPC)

EDUCATION

Master of Computer Science (Focus on **Computer Vision**), **The University of Auckland,** 2025 - **Present**

Bachelor of Science - Major in Computer Science, The University of Auckland**,** 2020 - June 2024

- Developed strong foundation in software development theories: OOP, SOLID Principles, MVC Pattern.
- Enrolled Courses include: cyber security, machine learning, applied algorithms, large scale software development, computing in distributed systems etc...
